

Aluminium body with a neoprene washer and aluminium mandrel for fitting aluminium and steel sections together with a pilot hole.

Application Features

- For aluminium or steel sections with a combination thickness within the specified grip range
- Designed with a large counter-head that offers three double parts permitting a large contact area on blind side
- 5.3mm - 5.6mm diameter pilot hole
- Flange diameter of 11.6mm

Material Specification

- Aluminium body incorporating a neoprene and an aluminium mandrel
- Rivet body: 5000 series aluminium
- Mandrel: 5000 series aluminium

Performance Details

Ultimate Fastener Tensile Strength

Fastener Diameter	kN
6.4 x L	3.00

Ultimate Fastener Shear Strength

Fastener Diameter	kN
6.4 x L	2.00

Pullout is limited by the ultimate tensile strength of the rivet

Drive Tool

Rivet range

Figures shown on this data sheet are based on results obtained from tests carried out in EJOT UK's Applitec laboratory in accordance with equipment conforming to current industry standards, on a random sample of fasteners manufactured to EJOT tolerances. Information supplied should form part of a general guide and should performance data for a specific application be required please do not hesitate to contact us.
