

### PRODUCT SPECIFICATION *HERTALAN*® PREFAB CORNERS

#### **HERTALAN**®

Since 1965, Carlisle Construction Materials BV has been producing and selling various synthetic rubber foils of extremely high quality all around the world. The successful *HERTALAN*® EPDM foil is the best known of those products.

#### **HERTALAN**® PREFAB CORNERS

*HERTALAN*® prefab corners are designed for *HERTALAN*® roofing systems and offer the security of optimum compatibility with the other *HERTALAN*® products.

Dimensions	
Internal corner (90°)	100 x 100 x 100 mm
	200 x 200 x 300 mm
External corner (90°)	200 x 200 x 100 mm
	300 x 300 x 150 mm
Skylight corner (45°)	180 x 150 x 150 mm

The standard sizes are also available with an *EASY WELD* strip on the underside. Different dimensions and shapes can be made to order.

#### **Instructions**

Installing the *HERTALAN*® prefab corners is in function of the *HERTALAN*® roofing system with either hot-air welding or gluing.

If the detail cannot be finished with a prefab corner, it is possible to use *HERTALAN*® *FLASHING* or *FLASH WELD* depending on the *HERTALAN*® roofing system.

*HERTALAN*® prefab external corner and internal corner
